## Writing | Part 1

In my opinion, travelling is very exciting and everyone, including me, likes to travel because it allows you to discover new countries and cultures. But what you have to decide is whether you should travel alone, or with others. There are advantages and disadvantages to each.

If you travel alone, you are free to go anywhere; there is no one who will refuse to follow you to the place you want to go! However, you may feel extremely lonely. You haven't got anyone to enjoy the trip with. Apart from that, a solo trip is more expensive, because you have to pay for everything yourself and you can't share the cost with anyone.

If you travel with your friends, you will enjoy the journey more than if you are alone. Humans are social creatures and being with someone else is good for your mind. With friends, the journey will not be boring! In fact, there aren't many disadvantages to travelling with friends. The only one is that you might disagree with them about the places you want to visit. This isn't a serious disadvantage, because sooner or later you have to reach a decision.

Finally, you could travel with your parents. This is the best solution, because you aren't responsible for anything and you go everywhere your parents go. You probably don't have to pay for anything yourself. However, if you are above the age of eighteen, you won't want to travel with your parents, because this will restrict you, which is something you don't want. You will want to decide what to do and this is impossible with your parents around.
