Writing

My sisters and I

I am so glad ~~thm~~ I'm not an only child. Of course, my parents are great, but they don't always understand the problems of being young. That's when I appreciate having sisters. I'm in the middle of two sisters and we spend all our time together. They are my best friends and we get on really well. Of course, we sometimes fight – for example, if I borrow a sister's clothes without permission or if our bedroom gets too messy. They are much tidier than me. We don't usually have many problems but if I argue with one sister, there is always the other one to talk to. We have the same taste in music, too. I think that without my sisters, life would be very boring. Would I like to have a brother, too? I'm not so sure. I think I like having sisters more.

**Please, ask your teacher if you have
made a mistake and would like it
explained.**
