A good university

There are several reasons why a university or college is a good place to study. I think that the lectures are very important, but there are other things that make the experience special. For example, if you are studying science, it's good to have laboratories and equipment to do practical work.

However, in my opinion I think that one of the most important experiences at university is meeting other people, so the social activities it has are vital. Some people like sport, others like dancing. There should be activities for all kinds of people so that they can have fun after studying and make friends. (108)
